

Consumer Price Index, base period June 2019

The Central Bureau of Statistics presents the main findings for the Consumer Price Index (CPI) for the month of April 2026

Consumer Price Index for the month of April 2026

The CPI for April 2026 (110.78) shows an increase of 0.1% compared to the index of March 2026 (110.70). The percentage change of the CPI over the last twelve (12) months (April 2025 to April 2026) is 0.8%, an increase of 0.4 percentage points (ppts) compared to the percentage change for the same period of last year (0.4%). The period average (last 24 months) percentage change of the CPI for the periods April 2024 to April 2025 and April 2025 to April 2026 is 0.2%, a decrease of 1.1 ppts compared to the period average percentage change over the periods April 2023 to April 2024 and April 2024 to April 2025 (1.3%).

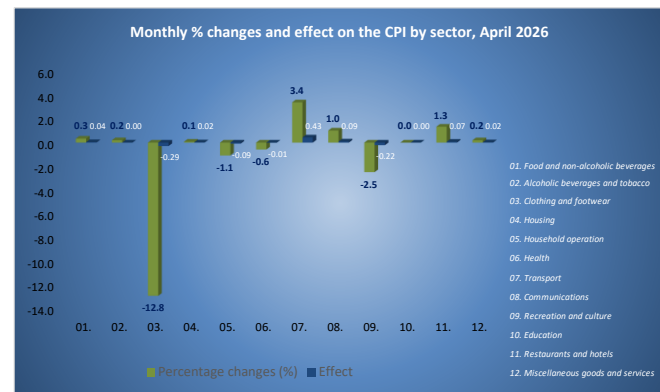

During this month, seven (7) of the twelve (12) sectors registered increases in prices. The increase that had the greatest influence on the CPI were registered for the "Transport" (3.4%) and "Communications" (1.0%) sectors, which contributed respectively to an effect of 0.43 and 0.09 ppts. The increases in the remaining sectors had an effect of 0.15 ppts for the CPI of April 2026.

Aforementioned increases were partially offset mainly by decreases in the indices for the "Clothing and footwear" (-12.8%)

and "Recreation and culture" (-2.5%) sectors, which contributed with an effect of respectively, -0.29 and -0.22 ppts. The decreases in the remaining sector had an effect of -0.10 ppts for the CPI of April 2026.

The increase in the "Transport" sector was due to an increase of 6.8% in the category "Operation of personal transport equipment", which contributed to an effect of 0.53 ppts. The increase in the "Communications" sector was mainly due to an increase in the category "Telephone and telefax equipment" (12.0%), which contributed to an effect of 0.09 ppts.

The decrease in the "Clothing and footwear" sector was mainly due to a decrease in the category "Clothing" (-12.1%), which contributed to an effect of -0.22 ppts. The decrease in the "Recreation and culture" sector was mainly due to a decrease in the category "Holidays" (-11.3%), which contributed to an effect of -0.27 ppts.

Consumption basket

The consumption basket of the CPI consists of 408 goods and services. Compared to March 2026, 43.9% of these products had an increase in price, causing an effect of 1.43 ppts, while 39.0% showed a decrease, contributing to an effect of -1.36 ppts and the remaining 17.2% had no change in price. Compared to March 2026, the prices of goods (0.4%) show an increase and caused an influence of 0.26 ppts, while the prices of services (-0.4%) show a decrease and contributed with an effect of -0.19 ppts on the CPI of April 2026.

- Figures have been rounded for clarity. Minor discrepancies may exist between individual values and their aggregated totals. These differences do not affect the overall accuracy or integrity of the data.
- Certain product groups are subject to frequent changes in models, quality, or specifications, which limits strict item-to-item price comparability over time. Product replacement is therefore applied in line with internationally accepted CPI methodology to maintain representativity and relevance. For a more detailed explanation, reference is made to the ACPI Methodology Statement on our website (www.cbs.aw).

Core inflation

The CPIC (core inflation) - CPI excluding the effect of energy and food – was 0.9% in April 2026. The energy index - which consists of the products: electricity, water, gasoline and diesel – was -3.4%. The food index showed an increase of 0.9%.

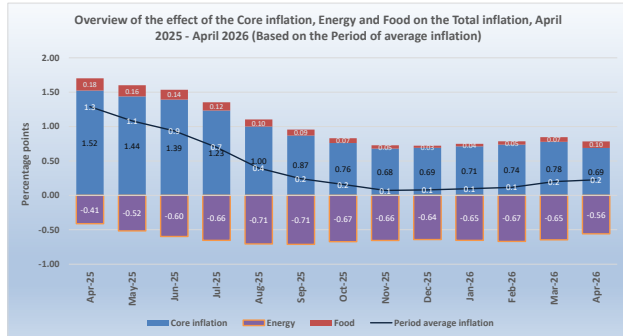

What is CPIC?

The CPIC (core inflation) is a portion of the inflation where certain items, which have volatile price movements, are excluded, such as food products and energy. When calculating the core inflation, the most volatile components are eliminated from the inflation. The core inflation index is used to assess the medium and long-term trends of the general level of prices. For purposes of economic policymaking, especially monetary policy, many economists focus on the proportion of the core inflation, as this allows a more in-depth evaluation of the recent inflation developments in the economy.

The CPIC is calculated by comparing the average index for the most recent 12-month period compared with the preceding 12-month period (Period average).

The three main uses of a CPI are:

1. a calculation method to compensate employees due to the loss of purchasing power, adjusting their salaries, with the percentage change rate of the CPI, which is known as indexation.
2. a tool used in National Accounts to adjust components of the gross domestic product (GDP) from nominal terms to real terms. (For example, by eliminating the effect of the price changes from the consumption value)
3. a means commonly used by governments and central banks to set inflation targets.

Subsistence level

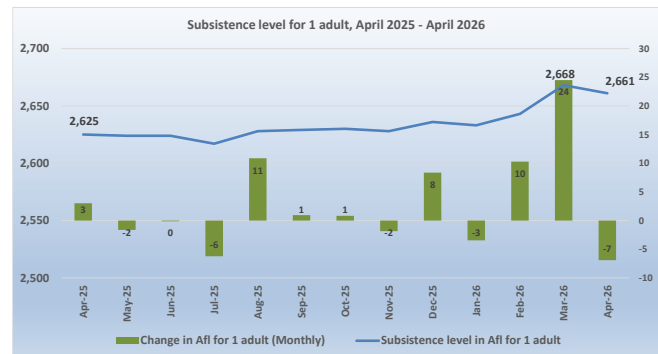

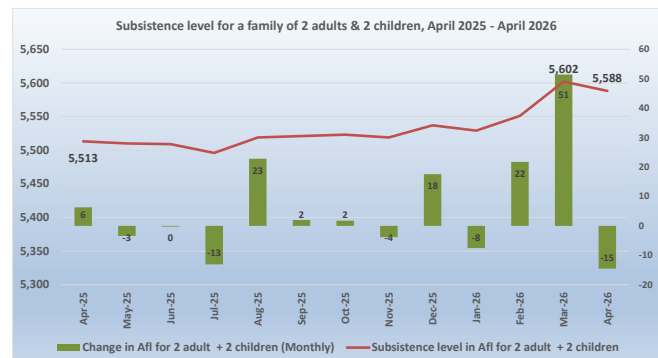

The subsistence level for a household consisting of two (2) adults and two (2) children (aged 0-14) in April 2026 is Afl. 5,588, a decrease of Afl. 14 compared to March 2026 (Afl. 5,602). The subsistence level for a single adult household is Afl. 2,661, a decrease of Afl. 7 compared to March 2026 (Afl. 2,668).

What is the Subsistence level and how is it adjusted?

The CBS defines the subsistence level as the minimum level of income that is perceived as necessary for a person or family to be able to function in the society in an adequate and socially acceptable manner. When the definition of subsistence level is used, it refers in reality to a "Social subsistence level" and not the literal definition "the money needed to purchase those goods and services deemed necessary for living a life free of basic deprivation" (United Nations).

A subsistence level index was created by calculating the cost of the essential resources that an average adult consumes during a month. Each month this index is adjusted, based on the prices of food, clothing, shelter, transportation, and other items in the basket.

The current subsistence level is based on the "Subsistence level 2010" report published by the CBS in December 2010, and is updated monthly according to the CPI. The reference unit used in this report is of a household consisting of two adults and two children (aged 0-14). The total weight of such a household is 2.1 (1.0 + 0.5 + 0.3 + 0.3).

L.G. Smith Boulevard 160 | Oranjestad, Aruba | Tel: +297 5247433 | Fax: +297 5838057 | www.cbs.aw | 22 May 2026

- Figures have been rounded for clarity. Minor discrepancies may exist between individual values and their aggregated totals. These differences do not affect the overall accuracy or integrity of the data.
- Certain product groups are subject to frequent changes in models, quality, or specifications, which limits strict item-to-item price comparability over time. Product replacement is therefore applied in line with internationally accepted CPI methodology to maintain representativity and relevance. For a more detailed explanation, reference is made to the ACPI Methodology Statement on our website (www.cbs.aw).

The subsistence level in April 2026

The subsistence level is the minimum level of income which is perceived necessary to achieve an adequate standard of living in a given country. The subsistence level is usually determined by estimating the cost of all the essential resources that an average adult consumes in one month or year. This is commonly called a basic needs index, and varies according to the price of food, clothing, housing, transport and other items in the "basket". Equivalent scales are used to adjust the assumed standard of living, of households of different sizes and composition. The scale assigns a weight of 1.0 for the first adult and 0.5 for each additional adult in the household (aged 15+) and a weight of 0.3 for each child (aged 0-14). The subsistence level is based on figures of the report "Bestaansminimum 2010" and is monthly updated for inflation using the monthly CPI. The reference unit used in this report is a household consisting of two (2) adults and two (2) children (aged 0-14).

In April 2026 the monthly subsistence level for a household consisted of two (2) adults and two (2) children (aged 0-14) (Afl. 5,588) showed an increase of Afl. 75 compared to April 2025 (Afl. 5,513) and was mainly caused by an increase of Afl. 78 in the sector "Food and non-alcoholic beverages". The largest decrease in April 2026 was registered in the sector "Clothing and footwear" (Afl. -28).

In April 2026, the monthly subsistence level for a single adult household is Afl. 2,661, which represents an income deficit of Afl. 654, an increase of Afl. 15 compared to the deficit observed one year ago (Afl. 639). This deficit is the second highest registered over a period of six (6) years for the month of April.

Table 3 Monthly income surplus/deficit (in Afl.) for a single adult household

Change in prices of crude oil, utilities, gasoline and diesel in April 2026

The prices of utilities (electricity and water), gasoline and diesel are for the greater part determined by international crude oil prices. In April 2026 the average price per barrel of crude oil (US\$ 99.87) had an increase of US\$ 9.72 (10.8%) compared to March 2026 (US\$ 90.15).

The prices of electricity and water did not change compared to March 2026. Subsequently, the average electricity price per household remained at Afl. 263.67, while the average price of water per household remained at Afl. 168.73.

In April 2026 the price of gasoline registered an increase of Afl. 24.60 cents (11.0%) and had an effect of 0.46 pts on the CPI. The price of diesel registered an increase of Afl. 45.10 cents (22.4%) and had an effect of 0.07 pts for the CPI of April 2026.

In April 2026, utilities, gasoline and diesel as a group, showed an increase in price of 3.3% compared to March 2026, and had an effect of 0.52 pts on the CPI, while the remaining 404 goods and services, as a group, show a decrease of 0.5% and had an effect of -0.45 pts on the CPI.

- Figures have been rounded for clarity. Minor discrepancies may exist between individual values and their aggregated totals. These differences do not affect the overall accuracy or integrity of the data.
- Certain product groups are subject to frequent changes in models, quality, or specifications, which limits strict item-to-item price comparability over time. Product replacement is therefore applied in line with internationally accepted CPI methodology to maintain representativity and relevance. For a more detailed explanation, reference is made to the ACPI Methodology Statement on our website (www.cbs.aw).

Change in prices of Food & Catering Services in April 2026

The “Food & catering services” index showed an increase of 0.3% in April 2026, after having increased also 0.3% in March 2026. The index for “Food at home” showed an increase of 0.3% in April, as eight (8) of the eleven (11) “Food at home” indices increased in April 2026. The “Potatoes and other tubers” index registered the largest increase (2.4%) in April 2026. Furthermore, other significant increases were posted in the indices for “Fruit” (0.9%), “Sugar, jam, honey and other confectionery” (0.7%) and “Fish and other seafood” (0.7%).

The largest decrease in April 2026 was registered for the index of “Vegetables” (-0.6%).

The index for “Food away from home” shows an increase of 0.1% in April 2026.

In April 2026, “Food at home” and “Food away from home” as a group showed an increase in price of 0.3% compared to March 2026 and had an effect of 0.05 pts on the CPI, while the remaining goods and services, as a group, experienced an increase in price of 0.03%, causing an effect of 0.02 pts on the CPI.

CPI for the period April 2025 – April 2026

Consumer Price Index

Over the last 12 months, the CPI increased by 0.8%. Eight (8) of the twelve (12) sectors registered increases in prices. The increases that had the greatest influence on the CPI were registered for the “Transport” (3.3%), “Food and non-alcoholic beverages” (3.4%), “Restaurants and hotels” (6.3%), “Communications” (3.1%) and “Miscellaneous goods and services” (2.0%) sectors, which contributed with an effect of respectively, 0.43, 0.39, 0.32, 0.27 and 0.24 ppts. The increases in the remaining sectors had an effect of 0.25 ppts for the CPI of April 2025 - April 2026.

Aforementioned increases were partially offset mainly by a decrease in the index for the “Household operation” (-8.5%) sector, causing an effect of -0.76 ppts for the CPI of April 2025 - April 2026. The decreases in the remaining sectors had an effect of -0.37 ppts for the CPI of April 2025 - April 2026.

The increase in the “Transport” sector was mainly due to an increase in the category “Operation of personal transport equipment” (4.1%), which contributed to an effect of 0.33 ppts. The increase in the “Food and non-alcoholic beverages” sector was mainly due to an increase in the category “Food” (3.2%), which contributed to an effect of 0.33 ppts. The increase in the “Restaurants and hotels” sector was due to increases in the categories “Catering services” (3.8%) and “Accommodation services” (88.4%), which contributed to an effect of respectively, 0.19 and 0.13 ppts. The increase in the “Communications” sector was due to an increase in the category “Telephone and telefax equipment” (47.0%), which contributed to an effect of 0.27 ppts. The increase in the “Miscellaneous goods and services” sector was due to increases in the categories “Personal care” (3.5%) and “Personal effects n.e.c.” (7.9%), which contributed to an effect of respectively, 0.14 and 0.10 ppts.

The decrease in the “Household operation” sector was mainly due to a decrease of 27.1% in the category “Household appliances”, which contributed to an effect of -0.69 ppts.

Consumption basket

Over the last year 51.2% of the products in the consumption basket experienced an increase in price, causing an effect of 2.76 ppts, while 36.8% showed a decrease, contributing to an effect of -1.99 ppts and the remaining 12.0% had no change in price. The prices of goods (-0.1%) showed a decrease and caused an influence of -0.06 ppts, while the prices of services (2.0%) registered an increase and contributed with an effect of 0.83 ppts.

Subsistence level

Over the last 12 months, the subsistence level for a household consisting of two (2) adults and two (2) children (aged 0-14) registered an increase of Afl. 75, from Afl. 5,513 in April 2025 to Afl. 5,588, in April 2026. This increase was mainly due to increases in the “Food and non-alcoholic beverages” (Afl. 78) and “Housing” (Afl. 14) sectors.

Change in prices of crude oil, utilities, gasoline and diesel

The average price per barrel of crude oil registered an increase of US\$ 35.65 (55.5%) from US\$ 64.22 in April 2025 to US\$ 99.87 in April 2026.

The energy index increased by 1.3% over the past 12 months and had an influence of 0.21 ppts. The indices of “Gasoline” (3.4%) and “Diesel” (19.5%) registered increases over the last year, contributing with an effect of respectively, 0.15 and 0.06 ppts on the yearly CPI. The indices of “Electricity” and “Water” did not register any changes had no effect on the CPI over this period, while the remaining 404 goods and services, as a group, show an increase of 0.7% and had an effect of 0.56 ppts on the CPI.

Change in prices of Food & Catering Services

Over the last 12 months, the “Food & catering services” increased by 3.5%. The “Food at home” index showed an increase of 3.4%, where nine (9) of the “Food at home” food groups increased over this period.

The “Vegetables” index increased by 7.2%, the largest increase among the “Food at home” food groups. Furthermore, other significant increases were posted in the indices for “Sugar, jam, honey and other confectionery” (6.9%), “Fruit” (5.5%), “Non-alcoholic beverages” (4.4%), “Meat” (3.9%) and “Food products n.e.c.” (3.4%). The largest decrease during this period was registered in the index for “Potatoes and other tubers” (-8.1%).

The index for “Food away from home” increased by 3.8% over the last 12 months.

Over the last 12 months, “Food at home” and “Food away from home” as a group showed an increase in price of 3.5% and had an effect of 0.58 ppts on the CPI, while the remaining goods and services, as a group, experienced an increase in price of 0.2%, causing an effect of 0.19 ppts on the CPI.

¹ Average West Texas Intermediate (WTI) crude oil price per barrel in US\$ (Source: U.S. Energy Information Administration)

² Total energy charge in Afl. cents per kWh

³ Fixed charge was introduced in October 2014 at Afl. 2.50

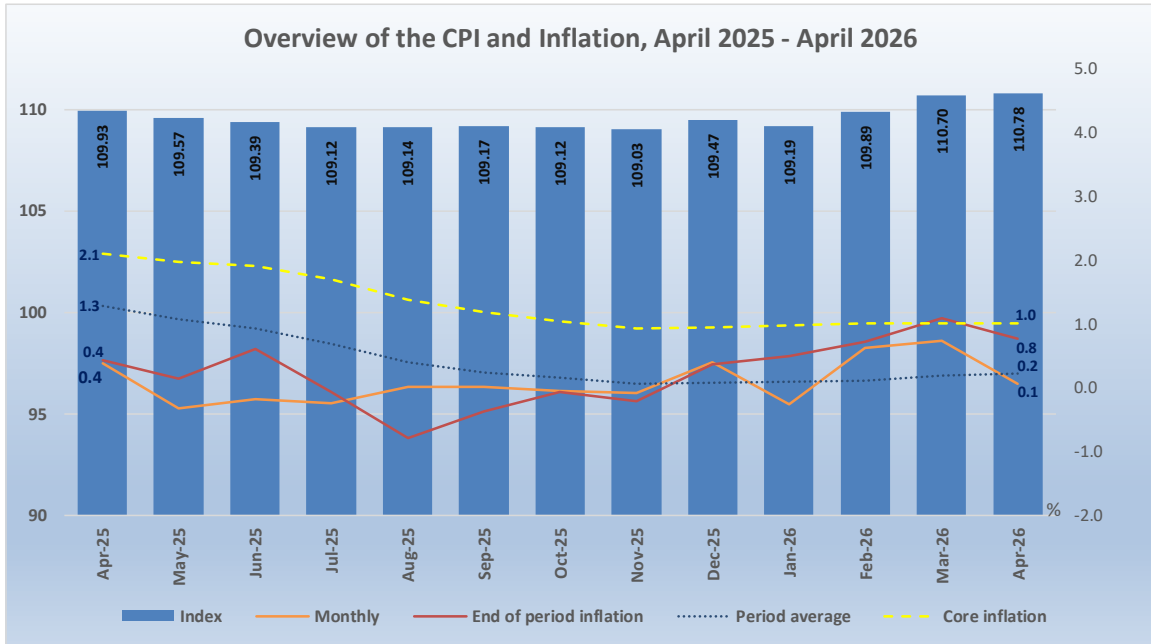

⁴ Electricity price in Afl. is based on an average household usage of 725.5 kWh

⁵ Water price in Afl. is based on an average household usage

⁶ Gasoline and diesel prices in Afl. cents per liter

- Figures have been rounded for clarity. Minor discrepancies may exist between individual values and their aggregated totals. These differences do not affect the overall accuracy or integrity of the data.
- Certain product groups are subject to frequent changes in models, quality, or specifications, which limits strict item-to-item price comparability over time. Product replacement is therefore applied in line with internationally accepted CPI methodology to maintain representativity and relevance. For a more detailed explanation, reference is made to the ACPI Methodology Statement on our website (www.cbs.aw).
